Junior Fullstack Developer (Java | React | DevOps)

Summary

Fullstack Developer with experience building production-level REST APIs, scalable backend services, and modern frontend interfaces. Strong in Java, Spring Boot, React, and TypeScript. Skilled in architecture, data modeling, error handling, and CI/CD workflows. Collaborative team player with experience working in cross-functional teams of developers and QA testers. Motivated to contribute to impactful projects.

Open to part-time roles and internships, with focus on backend/frontend development. Currently employed full-time, seeking remote opportunities for the initial period to balance professional growth with existing commitments.

Skills

- **Backend:** Java, Spring Boot, Hibernate, REST API, PostgreSQL, MySQL, JPA, Gradle, Maven
- **Frontend:** React, TypeScript, Redux Toolkit, Tailwind CSS, Axios, React Router, Formik
- **DevOps & Tools:** Docker, GitHub Actions, CI/CD, Swagger/OpenAPI, Postman, Linux CLI
- **Software Engineering Practices:** Clean Architecture, DTO Mapping, Error Handling, API Design, JUnit Testing

Projects & Experience

Task Tracker Platform (Ongoing, Team of 6) *Oct 2025 – Present*

- Collaborating with 4 developers and 2 QA testers to build a fullstack task and project management application.
- Built secure ownership transfer logic and role-based access control.
- Created reusable UI components and optimized UX for invitations and notifications.
- Designed robust API error-handling and validation mechanisms.
- Contributed to CI/CD pipelines, Docker workflows, and deployment preparation.
- **Tech stack:** Java, Spring Boot, React, TypeScript, Redux, Docker, MySQL

Internal Project Management System — UP Team (Remote) *Oct 2025 – Nov 2025*

- Refactored DTO structure to improve clarity and maintainability.
- Implemented dynamic UI elements for invitations and project roles.
- Enhanced backend collaboration logic with predictable state transitions.
- **Tech stack:** Java, Spring Boot, React, TypeScript, Redux, Docker, MySQL

Education

- **Fullstack Developer Program** — AIT-TR Berlin (2025)
- **Bachelor's Degree** — USEFS (2013)

Languages

- Romanian, Russian — Fluent
- English, German, Bulgarian — Basic (actively improving)
